Project in artificial intelligence vacuum cleaner using Raspberry Pi3

- ▣ Designed a Smart Vacuum Cleaner for house cleaning and daily use within the stipulated time. Used and applied raspberry Pi3 and arduino as well as programming skills to make and test the device. Worked with a 5-member research team for accomplishing the same. Our future aspects of the project is to use AI reinforcement and to reduce the physical work of a person. It can detect garbage and trash with a intelligent camera sensing technology and can be accessed remotely.
